BioPur Inc represents a full range of green innovation by not only serving as a collection and processing agency for waste oil products, but also as Connecticut's first large scale biodiesel producer and electrical co-generator of green energy. At this facility waste vegetable oil, which would have been sent to a rendering company or land fill, is instead diverted into our process stream where it is ultimately turned into a valuable clean energy source. The used vegetable oil we collect is then filtered, decanted, and processed to the point where a once dirty waste byproduct is transformed into a valuable feedstock that can be turned into a fuel source for our community. Bars give up about 20 percent of annual sales to overpouring, illicit freebies and theft. At Bevinco, our job is to eliminate that loss and put it back in your bottom line. We guarantee to increase profits by 10% of alcohol sales and reduce shrinkage to 5 percent or less. Bevinco's weekly service compares product usage to sales for every drop of liquor, beer and wine dispensed, while Bevinco's reports detail product usage by brand, help in the detection of theft and provide insightful consultation to ensure prevention.
